## SUMMARY

Full Stack & AI Engineer who builds, trains, and deploys LLM-powered systems. Experience fine-tuning models, designing AI agents, and shipping production applications. Proficient across the stack: React, Next.js, Svelte, Node.js, Django, FastAPI, Python, Docker, Kubernetes, and cloud infrastructure (GCP, DigitalOcean, CI/CD). Track record of owning products end-to-end from architecture to production.

## SKILLS

<b>Programming</b>	Python, JavaScript (ES6+), TypeScript
<b>Frontend</b>	React, Next.js, Svelte, React Native (Expo), HTML5, CSS3, Tailwind
<b>Backend</b>	Node.js, Django, FastAPI, RESTful APIs, GraphQL
<b>AI/ML</b>	LLM Integration, Prompt Engineering, AI Agents, Workflow Automation, Fine-Tuning
<b>Cloud &amp; DevOps</b>	Docker, Kubernetes, CI/CD Pipelines, GCP, DigitalOcean, Vercel, Netlify
<b>Databases</b>	PostgreSQL, MongoDB, Redis
<b>Tools</b>	Git, GitHub, Linux, Nginx
<b>Languages</b>	Arabic (Native), English (Fluent), Kurdish (Basic), French & Spanish (Learning)

## EXPERIENCE

<b>Full Stack Software Engineer</b>	Jan 2026 - Present
Mount Seir Tech	<i>Remote</i>
• Develop full-stack features for AI-driven applications using Svelte (frontend) and Django + FastAPI (backend).	
• Architect backend systems with Docker containerization and Kubernetes deployment planning.	
• Integrate AI chat, LLM-powered automation, and business logic into product workflows.	
• Lead backend design for ParsaLink, an AI-powered CRM and automation platform.	
<b>AI Engineer</b>	Nov 2025 - Present
SoapBox	<i>Remote</i>
• Design and implement LLM-powered systems including prompt engineering, AI agents, and automation workflows.	
• Develop backend services and API integrations using Python and Node.js.	
• Manage deployment infrastructure with Docker, CI/CD pipelines, and cloud services (DigitalOcean, GCP).	
• Train and fine-tune proprietary LLM models for product-specific use cases.	
• Own and maintain company systems including website, CRM, and internal tools.	
<b>Full Stack Software Engineer (Volunteer)</b>	Nov 2025 - Present
Disciple One / ViaApp (Nonprofit)	<i>Remote</i>
• Build and deploy responsive websites and admin dashboards using React, Next.js, and Node.js.	
• Develop React Native (Expo) mobile app features with backend API integration.	
• Manage containerized application infrastructure using Docker for production deployment.	
<b>IT &amp; Contract Manager</b>	Apr 2025 - Present
Real House Company	<i>Erbil, Iraq</i>
• Lead IT operations including internal systems, websites, email infrastructure, and technical support.	
• Implement scalable technical solutions improving system reliability and operational efficiency.	

<b>E-commerce Web Developer (Freelance)</b> Minime Iraq	Nov 2023 - Nov 2025 <i>Baghdad, Iraq</i>
--	---

- Built full-stack e-commerce platform with responsive design and third-party API integrations.
- Implemented payment processing, inventory management, and customer retention features.

<b>IT Specialist (Freelance)</b> Hamilton Iraq Real Estate	Nov 2023 - Nov 2025 <i>Erbil, Iraq</i>
---	---

- Developed and maintained company website and managed email infrastructure.
- Maintained IT systems, resolved connectivity issues, and ensured optimal computer performance.
- Set up and maintained conference room technology for meetings and presentations.

<b>Cell Site Technician</b> MTN (Aleppo) & Zain Sudan (Khartoum)	Oct 2015 - May 2018 <i>Syria &amp; Sudan</i>
---	---

- Installed, configured, and maintained telecom infrastructure including cell towers, antennas, and radio equipment.
- Diagnosed equipment issues and optimized network performance through testing and troubleshooting.

## PROJECTS

---

**SoapBox Super App.** Full-stack faith community platform with AI-assisted content generation, event management, multi-channel communication, prayer walls, and volunteer coordination. ([soapboxsuperapp.com](http://soapboxsuperapp.com))

**SoapBox Website Builder.** No-code website builder enabling churches to create custom websites with drag-and-drop functionality and templates. ([builder.soapboxsuperapp.com](http://builder.soapboxsuperapp.com))

**ViaApp.** Cross-platform mobile app (iOS, Android, Web) featuring daily devotionals, Bible study tools, prayer journal, and accountability partner matching. ([viaapp.life](http://viaapp.life))

**Disciple One.** Nonprofit platform with church dashboards for tracking spiritual growth, partner network management, and training resources. ([discipleone.life](http://discipleone.life))

**ParsaLink.** AI-powered CRM with automated lead engagement, AI chat, and workflow automation. Built with Svelte, Django, FastAPI, and Docker.

**Minime Iraq.** Complete e-commerce platform with payment processing, inventory management, and optimized UX.  
*Additional projects and code samples available upon request.*

## CERTIFICATIONS & TRAINING

---

<b>AWS Skill Builder — AI/ML &amp; Generative AI Track</b> 16 courses covering Machine Learning foundations, Generative AI concepts, Amazon Bedrock, Amazon Q, prompt engineering, and responsible AI practices.	Completed 2024 - 2025
---	-----------------------

## Professional Development Courses

- Web Accessibility Training — UNICEF
- Inclusive Communication — UNICEF
- HACT (Harmonized Approach to Cash Transfers) — UNICEF
- Psychosocial Support Programming
- Fleet Safety — UNHCR & Fleet Forum

## EDUCATION

---

<b>Telecommunications Engineering,</b> University of Aleppo, Syria Relevant Coursework: Network Design, Wireless Communication, Telecommunication Systems	Sep 2015 - Jul 2017
--	---------------------
